

XD Tyton™ Software

Product Specific Subscription Terms Appendix

These Product Specific Subscription Terms Appendix (“XD Tyton Appendix”) only covers the per device (iOS device) subscriptions Application Software as described in an Order.

Any term not defined herein is defined in the Basic Commercial or USG Subscription License (“Basic Subscription License”), as appropriate, and incorporated herein by reference. This XD Tyton Appendix provides the terms and conditions that govern the XD Tyton Software in addition to Owl Cyber Defense’s Basic Subscription License.

1. DEFINITIONS:

“XD Tyton™ Subscription” means the recurring license model under which the XD Tyton Software is provided on a per-device basis, renewed annually, and governed by Graduated Tiered Pricing.

“XD Tyton™” or “XD Tyton™ Software” means the application software that enables secure communications between, mobile devices (such as iOS devices) and the vendor (company manufacturing the mobile device that is being updated) to approve policy-driven operating system updates. It is licensed on a per-device subscription basis and operates as a protocol adapter, facilitating both the communications and the transfer and validation of update files across low-side and high-side network boundaries. The software is designed to work in conjunction with dedicated application servers or can operate in a virtual environment.

“XD Tyton™ Application Servers” means the required hardware components on which the XD Tyton Software operates. These servers are deployed in pairs (low-side and high-side) to support secure communications, and the secure transfer, processing, and validation of update files between network domains. **THE XD TYTON SUBSCRIPTION DOES NOT COVER ANY HARDWARE.**

“Graduated Tiered Pricing” means the pricing structure in which subscription discounts apply only after the prior tier is fully utilized.

“Software Support & Maintenance (SS&M)” means the comprehensive support for the XD Tyton Software that is included in the annual XD Tyton Subscription fee.

2. SUBSCRIPTION STRUCTURE**2.1 Annual Subscription**

Licensee must purchase a Subscription to the XD Tyton application software on a per-iOS device basis. The annual subscription tiers, and device ranges are defined in Exhibit A.

2.2 Minimum Purchase.

A minimum first-order purchase of twenty-five (25) device subscriptions is required.

2.3 Graduated Tier Rule

Subscription pricing is applied on a graduated basis across device tiers. Before any next-tier pricing applies, the prior tier must be fully utilized.

2.4 Hardware, Services, Warranty & Maintenance

The annual XD Tyton Subscription covers the XD Tyton Application Software only. Hardware for the required application servers, shipping, and related Warranty & Maintenance plans for hardware are purchased separately and are not included in the XD Tyton Subscription. SS&M for the XD Tyton application software is included as part of the annual Subscription fee.

3. PAYMENT; SUSPENSION

The payment obligations and suspension rights in Section 3 of the Basic Subscription License remain as written. **Failure to pay amounts due is a breach of the License and will result in the suspension of both on-going XD Tyton product updates to support new releases of the iOS operating system and SS&M from Owl personnel, until payment is made.** The Licensor agrees and acknowledges that any failure to receive any XD Tyton software releases supporting new versions of the iOS operating system, due to the failure to pay the subscription fee, shall not be the fault of Owl Cyber Defense and that Licensor has no claims for any damages regardless the legal principle against Owl Cyber Defense.

EXHIBIT A – PRICING TIERS AND PART NUMBERS

The following table defines the annual subscription tiers for the XD Tyton Application Software. Subscription pricing is applied on a graduated basis across device tiers, with new pricing applicable only after the prior tier is fully utilized. Device Subscriptions are purchased on a per-device basis, subject to a minimum initial purchase requirement.
