- Must facilitate the definition of tasks that form a basis for project tracking, internal project roles and responsibilities, deliverables and milestones
- Ensure that requirements are established, and that change control processes are followed
- The ability to function independently and manage competing priorities and business requests spanning across business lines and external partners
- Strong leadership, problem resolution and both written and verbal communication skills. This individual will interface with all levels of the organization

Job Summary

The Owl Cyber Defense is seeking a highly motivated, hands-on project manager with 10 or more years of experience and the demonstrated ability to successfully manage several complex projects simultaneously.

The Technical Project Manager has overall accountability for project success and is responsible for planning and managing the project budget, scope, schedule, quality, and resources. The successful candidate must be comfortable managing the technical and business components of a project. Successful coordination with Executive Management and leadership teams throughout the company is required. Familiarity and experience with cybersecurity processes is essential.

The ideal candidate must possess excellent communication skills, flexibility and adaptability in dynamic environments. Leadership skills and the ability to motivate and lead a team are required.
