

ASSURING THE CONFIDENTIALITY, INTEGRITY & AVAILABILITY OF YOUR TRUSTED SYSTEMS AND DATA

ABOUT OWL

Owl Cyber Defense provides cross domain, data diode, and portable media hardened network security checkpoints for ultimate threat prevention assurance and secure data availability. Owl's market-first technologies and services are designed to help you secure your systems and devices and provide you the data needed to accomplish your organizational objectives. Clients worldwide in defense, intelligence, critical infrastructure, industrial, and commercial markets trust Owl's unmatched expertise to protect their networks, systems, and devices.

HISTORY

Over twenty years of continued commitment to the world-class customer success and service excellence that have defined the Owl, Tresys, and ACS brands – now under the same banner of Owl Cyber Defense. Owl has an established history developing, building, and supporting the hardware and software cybersecurity systems that governments and industry leaders count on to protect their networks and data. As we extend our market-leading innovation through our extensive product development expertise, our goal is nothing less than defining the future of network boundary security technology for the coming decades.

CAPABILITIES & USE CASES

Owl solutions are designed to securely transfer data into or out of your trusted environment. From numerous supported protocols and hardened software expertise to industry-leading data diode hardware technology and multiple form factors, no other provider meets Owl's cross domain and edge protection capabilities. Clients trust Owl to provide high-assurance data transfer solutions for everything from classified content filtering to secure remote visibility into power plant operations.

OWL PRODUCTS

Owl's award-winning, accredited, and certified cybersecurity products help organizations large and small around the world to secure their sensitive networks and assets from cyber threats and data loss. Owl products are available for a range of data transfer requirements, and are primarily designed as single-box appliances, with data center, industrial, and tactical form factors. Along with the industry's most complete selection of protocol support, content filtering, and specialized software, there is an off-the-shelf, tailored, or custom Owl solution to meet nearly any cross domain or edge security requirements.

	CROSS DOMAIN SOLUTIONS (CDS) <i>For Government, Intelligence & Defense</i>	XD Bridge XD Bridge ST XD Bridge DCI V2CDS	CDFMV XD Guardian XD Guardian XML
